Portfiolo :

PROFESSIONAL SUMMARY

Innovative **full stack developer & Network Engineer** specializing in **Real-World problem Solving** Expert in bridging the gap between physical Networking (Huawei/Cisco) and decentralized ledgers (Sui/Move, Rust). Proven track record in building autonomous neural arbitrage engines and AI-driven insurance protocols that solve tangible economic problems. Focused on high-fidelity, neo-minimalist design and hardware-integrated software to drive institutional-grade asset management

---

TECHNICAL CORE

- **Blockchain & Web3:** Move (Sui), Rust (Solana), Sui dApp Kit, Web3.js, Ethers.js, Smart Contract Interaction, DApp Architecture.
- **Full-Stack Development:** React, Next.js, Vite, Node.js, Express, TypeScript, Tailwind CSS (Expert in Glassmorphism & Dark Mode).
- **Network & Systems:** Network Engineering (CCMAS), Network Diagnostics, Autonomous Agent Orchestration (ElizaOS), GPU Computing (Nosana).
- **Design & UI/UX:** Figma, Adobe Photoshop, High-fidelity Prototyping, Responsive Mobile-First Architectures.

Cortex Gas | Lead Developer (Nosana x ElizaOS)

- Engineered an autonomous gas intelligence engine and neural arbitrage agent.
- Integrated **ElizaOS** with **Nosana's GPU computing** to optimize real-time transaction routing.
- Developed a high-end dashboard featuring frosted-glass UI elements and real-time data visualization.

SolStrat | AI Strategy Architect (Solana)

- Built an AI-driven investment vault strategy platform on the **Solana** network.
- Implemented **Smart Money Concepts (SMC)** and **ICT** frameworks into the backend to identify liquidity sweeps and market structure shifts (MSS).

Lumina AI | Lead Developer (Gemini 3 Hackathon)

- Designed a Web3 Career Architect platform to automate "Alpha" capture via intelligent monitoring.
- Engineered an "Always-On" monitoring system for social signals and an automated execution engine using **React** and **Vite**.

Insuria AI | Frontend Engineer (Heirs Insurance)

- Developed the interface for an AI-driven insurance hub tailored to the Nigerian market.
- Crafted a sophisticated dark-themed UI with a "Launch Pad" navigation system for seamless user onboarding.

Lofi Quests | Full-Stack Developer (Sui Blockchain)

- Built a decentralized "Proof of Work" platform connecting developers with global grant opportunities.
- Integrated **Sui wallet authentication** and engineered a real-time leaderboard and bounty tracking system.

PROFESSIONAL EXPERIENCE

CodeAlpha | Software Engineering Intern

- Developed **Ripple**, a social media application, and **Zeno**, a professional e-commerce store.
- Streamlined mobile-first architectures, achieving sub-second load times for complex UI components.

Tecnohack | Software Intern

- Engineered a luxury e-commerce platform with a "Golden Era" aesthetic.
- Optimized imagery and layout for a high-end retail experience across all device types.

EDUCATION

B.Eng. Telecommunication Enginnering *Federal University of Technology Minna (FUT Minna*
